Health Fair 2014: Liver Disease: Prevention and Treatment

Aug 29, 2014

Mr. Peter Julian
Member of Parliament, Burnaby – New Westminster
Peter Julian, MP
7615 Sixth Street
Burnaby, BC V3N 3M6

Mr. Julian,

Re: Invitation to Opening Ceremony of Health Fair 2014.

On behalf of the organizers, Chinese Canadian Medical society (BC), Canadian Chinese Dental Society of BC, and S.U.C.C.E.S.S., we wish to cordially invite you to be an honoured guest at the opening ceremony of Health Fair 2014.

Our annual Health Fair strives to bring new and relevant information to the Chinese community in the lower mainland on various health topics. Since 1991, the Health Fair has served more than 30,000 people.

The theme of Health Fair 2014 is “Liver Disease: Prevention and Treatment.” Seminars, exhibitions, and health screenings will be held to educate members of the community on the prevention and treatment of liver diseases, as well as other health-related information. This year, we are proud to be working with organizations such as The BC Hepatitis Program of Vancouver General Hospital and BC Centre for Disease Control, as well as BC Transplant and InterCultural Online Health Network of UBC (iCON) in our endeavour to bring awareness to a community that has a high risk of having liver diseases.

The highlight of the fair includes a series of seminars conducted in Cantonese and Mandarin by dentists, doctors, and specialists, as well as free health screenings, including dental screening and blood tests for Hepatitis viruses. We are dedicated to help our 1000 estimated participants to have more understanding about their health.

As Member of Parliament for Burnaby – New Westminster and Leader of the Opposition in the House of Commons, it would be an honour for us to have you in our midst during the opening ceremony. Please find Health Fair 2014 details next page:
